

Pediatric Program

Come grow with us!

Mariann Young, Ph.D.

Director of Pediatric Services

Dr. Young is a child clinical psychologist who has been working in the field since 1977, and has specialized in the field of brain injury since 1992. Under her direction, the pediatric program was developed and instituted in January of 1994. Dr. Young actively oversees the program and provides treatment to clients and their families. She has significant experience in many areas of psychology as well as residential care.

Pediatric Program

Our pediatric program offers comprehensive residential, outpatient and day treatment options for children, adolescents and young adults with brain injuries. Young adults are able to participate in our unique Townhouse program, which enables learning and practicing skills of daily living and independence. We also offer residential respite care options for families who need short-term care.

To supplement our kids educational program(s) we offer...

- After School Program (September thru May)
- Saturday Day Program (September thru May)
- Summer Day Program (June thru August)
