

## About Functional Recovery

Functional Recovery and its team of physical, occupational and speech therapists have served clients with brain and spinal cord injuries for more than 12 years.

Based in Grand Blanc, Michigan, Functional Recovery offers home and community-based professional therapy services to adults, children and teens throughout Michigan.

## Functional Recovery Program Features

- Intervention in client's real-life environment—work, school, home reintegration
  - Flexible scheduling to meet the client's needs at home, work or school
  - Support and education to teachers, employers, families, clients and caregivers to ensure successful reintegration
  - Use of community resources and supports (community transportation, libraries, banks, etc.)
- Cognitive retraining
- Professional staff attendance at physician appointments, hospital or facility discharge meetings
- Family and team conferences
- Client specific discharge plan and goals
- Recreational and educational community outings
- Staff proficiency and training in use of Handwriting Without Tears program (school-based program)

## Assessments

When a client returns to home or work, Functional Recovery provides assessments of these environments to ensure the client continues to receive the proper care.

**Functional Assessment:** These evaluations are performed to assist in determining a client's therapy, durable medical equipment and attendant care needs.

**Home Assessment:** After a thorough review of a home environment, Functional Recovery will make recommendations for home modifications in order to create a barrier free or wheelchair accessible home/living environment.

**Worksite Assessment:** Functional Recovery can visit a worksite and make recommendations for modifications to the jobsite to maximize a client's ability to function in their work environment.

## School Staffing

Functional Recovery provides therapists to meet a school district's needs for full time, part time or temporary staffing need.

## Driver Evaluations

When it is determined that a client may be able to participate in an on-the-road driving assessment, Functional Recovery provides pre-driver's screening assessments to assist in determining the client's visual acuity, visual perception and reaction time.

## Summer Fun! Program

(located in Genesee County)

Run by Functional Recovery's Pediatric Rehabilitation Specialists, the Summer Fun! Program provides therapeutic activities for children and young adults, including prevocational training and community work opportunities.

## Our Expert, Caring Staff

To ensure the client receives the appropriate care at home, at work or in the community, Functional Recovery employs the following professional staff:

- Program Directors
- Internal Case Coordinators
- Physical and Occupational Therapists
- Speech and Language Pathologists
- Mental Health Professionals
- Recreational Therapists

### Char Combs, OTR/L CBIS

#### Program Director

Char began working in the brain injury field from an inpatient rehabilitation perspective. She has taken the same type of coordinated team effort to focus on returning the individual home and back into his or her own community while building the support necessary to ensure success. Char has worked extensively in home and community-based rehabilitation for more than 12 years.
